# Many Men Work Through University.

Approximately one-third of the men who enroll in the University of Missouri are partly or wholly self-supporting, and a considerably smaller per cent of women. A few of these students come equipped with a trade, such as stenography and type-writing, bookkeeping and printing, and they usually have little trouble in getting employment and in making enough money to live comfortably. For those students who know no trade, composing the large majority of self-supporting students, positions are harder to find and also pay less. Some live with families, the girls doing house work and taking care of babies, the boys tending furnaces, gardens, etc., for their room and board. Besides this, many students wait on tables, press clothes, clerk in stores, mow lawns, shovel snow, do tutoring, sewing and orchestra work. Employment bureaus are maintained to help students obtain work but nothing can be guaranteed. Men desiring information regarding employment should write the Secretary, Employment Bureau, Y. M. C. A., Columbia, Mo., and women desiring similar information should apply to the Secretary, Employment Bureau, Y. W. C. A., Academic Hall, Columbia.

There are a number of funds that may aid the student. Chief among these are the Rollins Aid Fund for men and Women from Boone County, and the William Alexander Gregory Educational Fund for general use. For description of these see the general catalog of University. Beside these, there are numerous fellowships, scholarships and prizes, including the Board of Curators' scholarship by which all students who rank first in the graduating class of any accredited Missouri High School are exempt from the first year's entrance fee.

Though chances of working one's way through the University are fairly good, probably as good those of any other University, the University authorities advise no student to come to Columbia without enough money to take him through the first semester of his freshman year, and also new students intending to work their way should be in Columbia a few days before school begins, September 18.

# THE BEST PROOF

# Lexington Citizens Cannot Doubt It.

Doan's Kidney Pills were used. They brought benefit.

The story was told to Lexington residents.

Time has strengthened the evidence.

Has proven the result lasting.

The testimony is from this locality.

The proof convincing.

Mrs. L. E. Hartman, Shelby St., Higginsville, Mo., says: "I had dreadful pains in my back, which I thought were rheumatic. My feet often swelled and I gradually grew worse. Three boxes of Doan's Kidney Pills removed these ailments and made me feel like a different woman."

**OVER SIX YEARS LATER,** Mrs. Hartman said: "The benefit Doan's Kidney Pills brought me has been permanent."

Price 50 cents at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Hartman has twice publicly recommended. Foster-Milburn Co., Props., Buffalo, N. Y.

# The September American Magazine.

In the September issue, Frank A. Vanderlip, President of the National City Bank of New York, tells how he picks men for the \$25,000 a year positions. Another man who never believed in God tells how he found God working by his side in his own office. A man who thought he was never appreciated in his work writes about his experiences and what he has learned in humility.

The fiction matches the articles for there are stories by well known writers as well as new ones.

"The Haunted House" by Ellis Parker Butler, "Better See the Doctor," "The Strike at Tiverton Manor," "Pics" by Jack Lait, "The Pampered Fledgling" by Walter P. Eaton, and "The Winning Hand" complete the short stories. There is also a generous installment of "Between Two Worlds" the serial by Philip Curtiss.

Among the other good things in the magazine are articles on golf by Jerome Travers, actors' salaries by Renold Wolf, the state article on New Hampshire by Winston Churchill, and the ideas of a writer who advocates changing your job after fifty.

The Interesting People department contains good stories about Admiral Dewey, a man who caught a 30,000 pound fish, and a circus bareback rider. The Family's Money tells of some experiences in the art of saving your coins.

# Rye For Fall Pasture.

After six weeks of severe drought and intense heat, blue grass and most other pastures are so dry that they will furnish no pasture until late in the fall even with the aid of the usual late summer and early fall rains. The man who has much livestock on hand will find it necessary to provide temporary fall and winter pasture. For this purpose there is no better crop than rye, according to C. B. Hutchinson, of the Missouri Agricultural Experiment Station.

Rye may be seeded any time during September or October and is not attacked by the Hessian fly so it will not endanger fall wheat. It may be sown just as early as the seed bed can be put into proper condition on stubble land or after corn has been cut for silage or fodder.

A bushel and a half is enough for early sowing but two bushels should be used later, or a mixture of 30 or 40 pounds of rye and 15 or 20 pounds of vetch will give good results if sown late in August or early in September.

Small fields of such cover crops furnish a great deal of pasture at little expense and leave the soil in better condition than if they had not been grown. The vetch is a legume which adds nitrogen and the fine roots of rye protect the soil against washing which is more serious between growing seasons than most people realize. Next spring the rye may be turned under as a grain manuring crop before corn planting time.

Sam Edmonds and two daughters spent Sunday in Kansas City.
